HOW TO SOLVE NUMBER FILL-INS

A Number Fill-In is solved just like a regular Fill-In, using numbers instead of words. Across and down entries cross each other. Each digit in an across entry is part of a down entry. We provide you with the lists of numbers, arranged numerically by length. To solve a Fill-In, start with the given number in the diagram and look for possible crossings. Lightly pencil in one choice from the List. Now, look at the List and check to see if there are entries in the List that can cross your penciled-in choice. For example, if your penciled-in number starts with a "6," be sure there is a crossing entry with a "6" in the correct position. If there isn't, pencil in another possibility. Continue until you are sure that your number is the one that fits there. Then, cross off that choice from the List. As you solve, the List gets smaller and solving is faster. We know that you'll find these puzzles a relaxing diversion and a pleasant challenge. *Happy solving.*
